

Mediware® Acquires BlueStrata EHR

Acquisition expands Mediware's solutions to include software for skilled nursing and assisted living facilities and offers BlueStrata EHR expanded resources for investments in innovation and sales

LENEXA, Kan. — August 1, 2018 — Mediware Information Systems, Inc., a portfolio company of TPG Capital and a leading supplier of software solutions in health care and human services, and BlueStrata EHR, a leading cloud-based electronic health record (EHR) for long-term post-acute care providers, are pleased to announce that Mediware has acquired BlueStrata EHR.

With the addition of BlueStrata EHR, Mediware expands its technology solutions into the long-term care market. The acquisition allows Mediware to better address the health care needs of the aging population and the business and process needs of the broader post-acute market, through accelerated product innovation as well as extensive analytics. This transaction is an ideal fit, as both Mediware and BlueStrata EHR support strong company cultures, are highly innovative, and deliver exceptional client service.

“We see tremendous potential with BlueStrata EHR. It’s a comprehensive, easy-to-use clinical and billing system for the long-term care industry,” said Bill Miller, CEO of Mediware. “BlueStrata EHR provides Mediware with a high-quality solution and a new market opportunity where we can share our expertise in improving care through technology. Together with BlueStrata EHR, Mediware now offers the broadest set of solutions in the post-acute software market, including home health, hospice, and rehab.”

BlueStrata EHR utilizes a cloud-based software as a service (SaaS) model designed to meet the specific clinical, financial, and operational needs of skilled nursing and assisted living facilities. The robust EHR is fully integrated with billing, accounting, and business intelligence modules, providing customers a seamless and comprehensive solution. Through this acquisition, BlueStrata EHR will have access to expanded resources, including investments in technology, sales, and marketing.

“Mediware understands the importance of home and community-based care and the growth opportunities driven by our aging population and need for higher quality, lower cost care,” said Todd Holtmann, President of BlueStrata EHR. “We share Mediware’s focus on great company culture and excellent customer service, so we believe this will truly help and benefit our customers.”

BlueStrata EHR is headquartered in St. Louis, Missouri, and Mediware plans to maintain this location. Both Mediware and BlueStrata EHR remain committed to customer success and will maintain the high-quality service, insights, and support that customers have come to expect from BlueStrata EHR.

Together, Mediware and BlueStrata EHR will create advanced technologies with expanded functionality to help long-term care and skilled nursing and assisted living facilities communicate and collaborate more effectively with other parts of the health care continuum.
